

## **Be the designer in your very own flower shop!**

Fantastic Flowers™ is a complete paper flower making studio where you dream up and create beautiful bouquets to assemble and share, over and over again!

It's easy to build endless blossoms! This complete kit comes with everything you need to create colorful paper flowers. Simply pick your paper, roll and punch out pretty petals with the roller press, then assemble the pieces onto each stem. Expand your creativity by using other kinds of paper, like magazine pages, wrapping paper, or even your own drawings to create one-of-a-kind designs straight from your flower shop!

Use your imagination to press and punch endless bouquets that will brighten anyone's day! You're the floral designer with Fantastic Flowers™!

## **Ideas and tips inside!**

# how to use the press

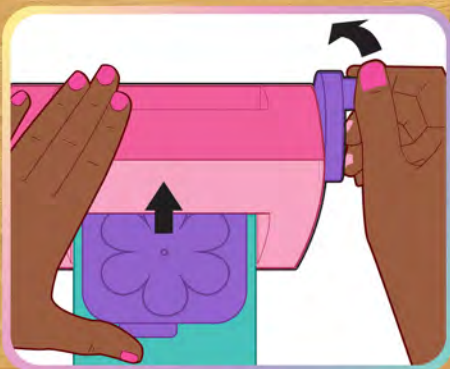

1

Choose a paper sheet for your Fantastic Flowers™ petal. Place it in the punch plate of your choice, then close the plate.

2

Roll the plate through the roller tool, hinge-side first.

Turn the handle in the direction indicated by the arrows, toward the back of the roller tool.

Give the punch plate a bit of a push to engage it in the roller tool and use your other hand to hold the press for extra stability.

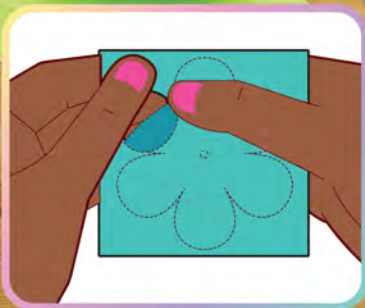

3

Open the plate and remove the paper.

4

Punch out the petals one at a time.

Work slowly when punching out your petals. Be careful to not tear your flowers when using thinner paper, like magazine pages or wrapping paper.

# how to assemble flowers

5

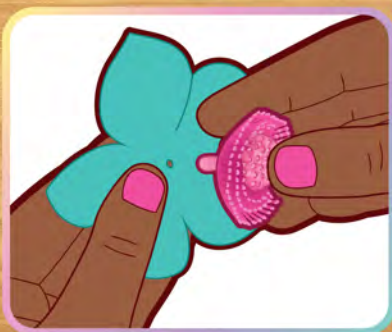

Choose a flower center and plug, and push the pointed end through the flower center's hole.

Now you're ready to attach the petals!

6

Push the plug through your petals one at a time through the petal hole. Be careful not to rip your flowers!

7

Push the flower plug, center, and paper petals into the hole in the center of the stem piece to complete your flower!

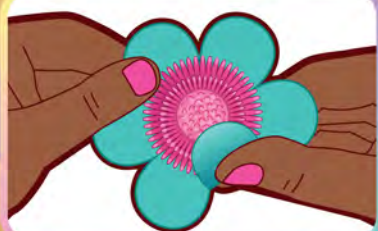

Create multiple petals with different plates and papers. Overlap the petals to create a layered effect.

# bouquet design ideas

Bend each petal up to allow the others to show when you layer them on a stem. Multiple layers work best!

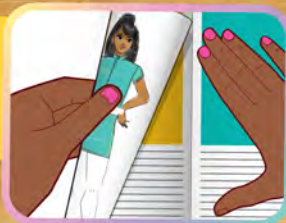

Use a pencil or pen to roll the edges of your petals down or up for a more realistic look.

Play with different paper color combos when creating flowers!

Decorate plain paper for your own custom bouquets!

Make petals from your own paper! Cut a 4-inch square from wrapping paper, construction paper or even magazine pages to roll in the plates.

Use a stationery brad to connect flower petals for other projects. You can also use a chenille craft stick for a stem, coiling it for your flower center!
