

Follow the wires from the buttons to the doors:
The Green button opens Door 11.
The Yellow button opens Door 13.
The Red button opens Door 4 or Door 7.
The Blue button opens Door 4 or Door 7.

No one pushed the Red button (Clue 3).

	Green	Yellow	Red	Blue
Arlo			X	
Bertrand			X	
Clarice			X	
Darlene			X	

Darlene is standing in front of Door 13, which she didn't open (Clue 2). So Darlene did not push Yellow.
Darlene pushed two buttons (Clue 3), so she pushed Blue and Green.

	Green	Yellow	Red	Blue
Arlo			X	
Bertrand			X	
Clarice			X	
Darlene	Access	X	X	Access

Clarice is standing in front of Door 11, which she didn't open (Clue 2). So Clarice did not push Green. Clarice pushed two buttons (Clue 3), so she pushed Blue and Yellow.

	Green	Yellow	Red	Blue
Arlo			X	
Bertrand			X	
Clarice	X	Access	X	Access
Darlene	Access	X	X	Access

Only one scientist opened the door to the warehouse (Clue 1). Since no one pressed Red and at least two scientists pressed Blue, the warehouse door button must be Green or Yellow.

The AI said the door to the warehouse is not the one in front of it so Door 11 (Green) is not the door. The warehouse door is Door 13 opened by the Yellow button.

Only one scientist has access to the warehouse door (Clue 1), which is Clarice.

Solution: Clarice, Door 13, Yellow.

	Green	Yellow (Warehouse)	Red	Blue
Arlo	Access	X	X	Access
Bertrand	Access	X	X	Access
Clarice	X	Access	X	Access
Darlene	Access	X	X	Access

(Note: Because no one pressed Red and only Clarice can open the Yellow door, Arlo and Bertrand must both be able to open the Green and Blue Doors.)
